## 01 ABOUT

Hi, I'm a software developer with a background in retail, team work and customer service who has made a deliberate move into tech. I've always enjoyed working with computers and building things, and I spend a lot of my spare time experimenting and learning outside of formal work. In my free time outside of work I'm practicing Python, learning about pentesting, and also working on a project using WebSockets which has been fun to mess around with.

Most recently I built and launched a website for a local Northland upholstery business, including the quote forms, email routing, hosting and Google setup.

I'm motivated by learning, problem-solving, and figuring out how things work. I'm looking to work with people who care about technology, enjoy learning, and like challenging as well as being challenged.

I've also been exploring agentic coding, setting up AI tools to work alongside me in the terminal to speed up development, while staying deliberate about reviewing, testing, and understanding everything that gets shipped.

## 02 SKILLS

FRONTEND
HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS

BACKEND
Node.js, Express, Knex.js, SQLite, RESTful APIs

TOOLS
Git, GitHub, Auth0, Agile methodology

HOSTING & SERVICES
Vercel, Render, Cloudflare, Resend

AI TOOLS
AI-assisted development (agentic workflows, critical review)

HUMAN SKILLS
Communication, Problem Solving, Time Management, Adaptability, Reliability

## 03 PROJECTS

### Northland Upholstery

northlandupholstery.com

A freelance website for a local Northland upholstery business. I built the frontend with Next.js and Tailwind CSS, including quote and contact forms that send emails straight to the client through Resend. I also set up their Google Business profile and Search Console, Facebook page, and Cloudflare, GitHub, Resend and Vercel accounts, all under their own ownership, so they don't need to rely on me. The site is live. The next piece is a secure admin area where they can upload, edit and delete gallery photos with descriptions.

### Vibing Violet

github.com/SashaDC/Messaging-App

My final group project at Dev Academy, a simple messaging app inspired by Discord. I was designated Product Owner as having come up with the idea, which meant explaining functionality and final product goals to the team. Key challenges included learning and implementing WebSockets for real-time messaging as having never touched WebSockets prior to this project, and resolving connection issues between WebSockets and the database when deploying to Render.com.

### Pixel Painter

github.com/SashaDC/Pixel-Painter

My first small independent project made early on during my time at Dev Academy, used as a way to practice React and problem solving. Two key challenges I faced were ensuring data cached itself for when the window reloaded, and getting the colour selector to work correctly with a full range of colour rather than a preselected variety.

## 04 EXPERIENCE

### Fullstack Developer Training

Feb 2025 - Dec 2025

Dev Academy Aotearoa, Online Campus

Completed a part-time programme focused on becoming a well-rounded full stack developer. Progressed through individual challenges, pair programming, and group projects, building both technical and collaborative skills. Key responsibilities and accomplishments include:

- Developed frontend and backend projects using JavaScript, React, Node.js, Express, and databases.
- Collaborated in agile style teams with planning, code reviews, and version control workflows.
- Built reusable components and implemented real time features in group projects.
- Improved problem solving, debugging, and time management skills while delivering functional features.

### Retail Assistant Supervisor (Replenishment)

Apr 2023 - Nov 2026

Woolworths Regent, Whangarei

Started at Woolworths in an entry-level role and gradually worked across several departments. The roles I've been in are Nightfill, Perishables Assistant, Perishables Supervisor, Replenishment Assistant and currently Retail Assistant Supervisor in Replenishment. This progression reflects my reliability, ability to learn quickly, and willingness to take initiative. My responsibilities include:

- Managing stock processes which include rotation, accuracy, and quality checks.
- Training and supporting new team members to help build their confidence.
- Overseeing department operations and stepping in where needed to keep things running smoothly.
- Completing compliance tasks like temperature checks, date/damage assessments, handling damaged or expired product workflows.
- Assisting customers and offering support to team members across the store.

### Volunteer

Sep 2021 - Feb 2022

North Haven Hospice Shop, Whangarei

I volunteered during high school to build confidence and gain real workplace experience. Supported the team by keeping shelves stocked, organising displays, and helping customers feel welcome. This role helped grow my communication skills and taught me how to work reliably in a small team.

## 05 EDUCATION

### New Zealand Certificate in Applied Software Development (Level 6)

Dev Academy Aotearoa, Online Campus

Feb 2025 - Dec 2025

### NCEA Levels 1, 2 and 3

Whangarei Boys' High School

Feb 2018 - Nov 2022

Workplace First Aid (Level 2), August 2022

Barista & Customer Service (Level 3), September 2022

### Other qualifications

First Aid Refresher, July 2024

New Zealand Certificate in Food or Beverage Processing (Level 2), June 2025
